EDUCATION

Yale University, New Haven, CT

May 2024

B.A. in Computing and the Arts

Relevant Coursework: Human-Computer Interaction, Algorithmic Computer Music, Data Structures, Algorithms, Intelligent Robotics

Awards: First-Year Summer Research Fellowship in the Sciences and Engineering, Summer Experience Award

SKILLS

Languages: Python (FastAPI, Flask, Pydantic, ROS), TypeScript (Angular, React), Ionic, HTML, CSS (SCSS, Tailwind CSS), SQL

Methodologies: Agile (Scrum), Continuous Integration/Continuous Deployment (CI/CD)

Tools: Blender, Unity, Niantic 8th Wall, REST APIs, Postman, Snowflake, Notion, Excel, Jira, Confluence

Generative AI Tools: AISHA, Claude Code, Codex, Copilot, Cursor, Descript, Gemini

Certifications: Microsoft Azure AI Fundamentals, Microsoft Azure Fundamentals

WORK EXPERIENCE

Chubb, Technology Associate Rotational Program

Jun 2024 - present

Claims Data Analytics and Insights Team, Data Engineer Associate

Feb 2026 - present

- Spearheading the migration of personal identifiable information (PII) from an internal batch ingestion tool to Informatica Cloud (IICS) mass ingestion service to decrease data retrieval downtime and prevent data loss by 45%

Claims Data Ingestion Team, Data Engineer Associate

Jul 2025 - Feb 2026

- Streamlined claims information ingestion process through the development of the first notice of loss enrichment platform, increasing straight-through processing rates by 40%

Personal Risk Services Platforms and Mobile Team, Full-Stack Mobile Engineer Associate

Jun 2024 - Jul 2025

- Developed multiple sections of the [Chubb Agent Mobile](#) and [Chubb Mobile Apps](#) using Angular and Ionic for iOS and Android to optimize the insurance policy management experience for agents and clients in 54 countries
- Awarded the Team Impact Award for commendable contributions through skills, tenacity, fostering an environment of innovation, and implementing ideas that contribute to major technology initiatives

AOA Digital Storytelling, *Founder*

Apr 2025 - present

- Design and develop websites for three clients with website builders Squarespace and Domain.com, leading to more organized delivery of information and increased site traffic

Yale Social Robotics Lab, *Undergraduate Research Assistant*

Jun - Sep 2021; May - Jul 2023

- Developed participant engagement classification program for data analysis of 37 participant files, which counted how often and how long a participant talked to the robot, using Python and Google Speech-to-Text API
- Co-Authoring *"We Make a Great Team!"* by writing about the development, usage, and results of my participant engagement system, which was published in the 2022 ACM/IEEE International Conference on Human-Robot Interaction (HRI '22)
- Created an Emergency Exit feature with ROS to stop a robot-child interaction seamlessly for use in two research trials

LEADERSHIP EXPERIENCE

Kappa Kappa Gamma Sorority, *New Member Chair*

Feb 2021 - May 2024

- Integrated 25 new members into the Zeta Xi chapter through weekly meetings and community-building social events

Yale Women and Gender Minorities in CS, *Member*

Sep 2020 - May 2024

- Advised three first-year students to retain gender minorities in computer science majors
- Collaborated with Computer Science faculty to create the "Best Practices for Inclusive Teaching in Yale Computer Science" guide that accommodates people with disabilities, people of color, and gender minorities

PROJECTS

Integrating AR into Live Theatrical Performance *Niantic 8th Wall, Blender*

- Developed an Augmented Reality web app with an emphasis on theater designer, cast, and audience perspective for use in live performances of *Moon Man Walk*

What's AKW Listening To? *Python, Kinect*

- A Buzzfeed-like music taste quiz designed for building community around shared music interests / Adapted the project UI to work on a large interactive TV

Afrobeats Generator *Supercollider*

- A program to mix and match beats and melodies of three popular Afrobeats artists / Created GUI, the chords layer using arrays and the lyrics layer using a finite state machine
